

## EDUCATION

---

<b>University of British Columbia, Vancouver - PhD in Computer Science</b>	<i>September 2018 - Present</i>
<b>University of Colorado, Boulder - MS in Applied Mathematics</b>	<i>August 2017 - May 2018</i>
Master's Thesis: "A Probabilistic Modeling Approach to CRISPR-Cas9"	
<b>University of Colorado, Boulder - BS in Applied Mathematics</b>	<i>August 2013 - May 2017</i>
<b>Select Courses:</b> Machine/Statistical Learning, Convex Optimization, Network Analysis, MCMC, Mathematical/Bayesian/Spatial Statistics, Numerical Analysis, Linear Algebra, Probabilistic Programming.	

## TECHNICAL STRENGTHS

---

<b>Programming Languages</b>	Python 3/2, Clojure, MATLAB, R/R-Shiny, C++/C
<b>Software &amp; Tools</b>	LaTeX, Tableau, Mathematica, Db Visualizer, Alteryx, KNIME
<b>Database Systems</b>	Hadoop, Oracle, Hive SQL, Oracle SQL

## EXPERIENCE

---

<b>Research Assistant</b>	<i>September 2018 - Present</i>
<i>Co-Advised by Mark Schmidt and Frank Wood</i>	<i>University of British Columbia, Vancouver</i>
· Research focuses on finding more efficient optimization tools for inference based reinforcement learning.	
<b>Research Assistant</b>	<i>February 2016 - May 2018</i>
<i>Professor Manuel Lladser's Research Group</i>	<i>University of Colorado, Boulder</i>
· Use machine learning and Monte-Carlo simulation in conjunction with intuitive physical models to create accurate prediction and interpretable heuristics within biological systems. (Matlab, R, Python)	
<b>Teaching Assistant</b>	<i>September 2017 - May 2018</i>
<i>Applied Mathematics Department</i>	<i>University of Colorado, Boulder</i>
· One hour of lecturing 1-2 times per week, where I review the course material and then work one on one with students. (Pre-calculus, Calculus 3)	
<b>Data Science Intern (Summer)</b>	<i>May 2017 - August 2017</i>
<i>Seagate Technologies</i>	<i>Longmont, CO</i>
· Produced GUI in R-shiny that creates statistical visualizations of driver data for engineering divisions.	
· My program queried N-way join data from Hadoop clusters, pushed it to an Oracle server, then dynamically generated and pushed SQL queries built from user picks. Using dynamically queried data, I generated interpretable statistical metrics and visualizations within the GUI for the user. (R, R-shiny, Apache Hive, Oracle SQL)	
<b>Data Science Intern (Spring)</b>	<i>February 2017 - May 2017</i>
<i>Seagate Technologies</i>	<i>Longmont, CO</i>
· Performed a software evaluation report that reviewed current citizen data science platforms, as well as statistical visualization and GUI tool boxes. (Alteryx, KNIME, Tableau, R-shiny, SAS)	
<b>Marketing Analyst Intern</b>	<i>May 2016 - August 2016</i>
<i>Analytic Partners</i>	<i>Broomfield, CO</i>
· Created and then presented marketing model to maximize ROI via time-series analysis. Work included: data mining, data cleansing, model creation, model validation, and then model presentation. (VBA, R, Excel)	

## GRANTS/CONFERENCES

---

<b>UROP Grant:</b> <a href="https://www.colorado.edu/suep/urop/student-grants">https://www.colorado.edu/suep/urop/student-grants</a> (2015)
<b>EXTREEMS-QED Grant:</b> <a href="https://www.nsf.gov/awardsearch/showAward?AWD_ID=1331010">https://www.nsf.gov/awardsearch/showAward?AWD_ID=1331010</a> (2016, 2017)
<b>SIAM Conference:</b> Society for Industrial and Applied Mathematics (2016, 2017)

## PUBLICATIONS

---

<b>"A Zipper Model for R-loop Formation in CRISPR-dCas9"</b> (to be submitted)	<i>December 2018</i>
Investigation and modeling of targeting efficiency within CRISPR-dCas binding systems with respect to changes in the target RNA sequence composition via Markov chains.
